

Partnering with the Universe

For 20 years, David Makepeace has travelled the world to witness Total Solar Eclipses - a natural phenomenon that has been called the most spectacular event you can witness from earth.

"When the shadow of the Moon sweeps over us, we are brought into direct contact with a tangible presence that is awe-inspiring. That there is a powerful relationship between us and the immense forces of the universe becomes undeniable."

*What possible relationship could you have to the universe?
How could it make a difference in your life?*

With breathtaking film and video captured around the world at eclipse events, Makepeace takes us on a tour of our world & our solar system - widening the perspective on our lives as only an eclipse chaser can.

Discover how the simple beauty and mystery of our world can open the door to a greater awareness of what we are and our place in the universe.

Makepeace, aka., "The Pitchman for the Universe," recently presented "Understanding Ourselves in an Epic Universe" at the TEDx conference in Toronto.
